

CQI – Could not start QuickBooks

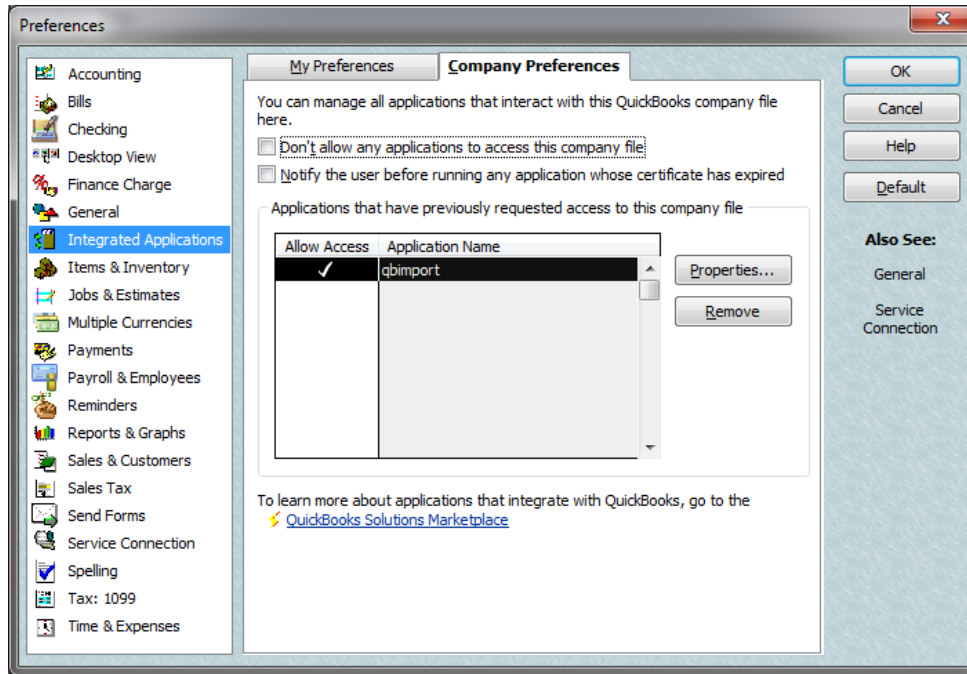

Error: Could not start QB

Got this error after upgrading QB 8 Pro to QB 10 Pro and converting the QB Company file.

How to Fix:

- > QB Preferences
- > Integrated Applications
- > <REMOVE>"qbimport "
- > Close QuickBooks

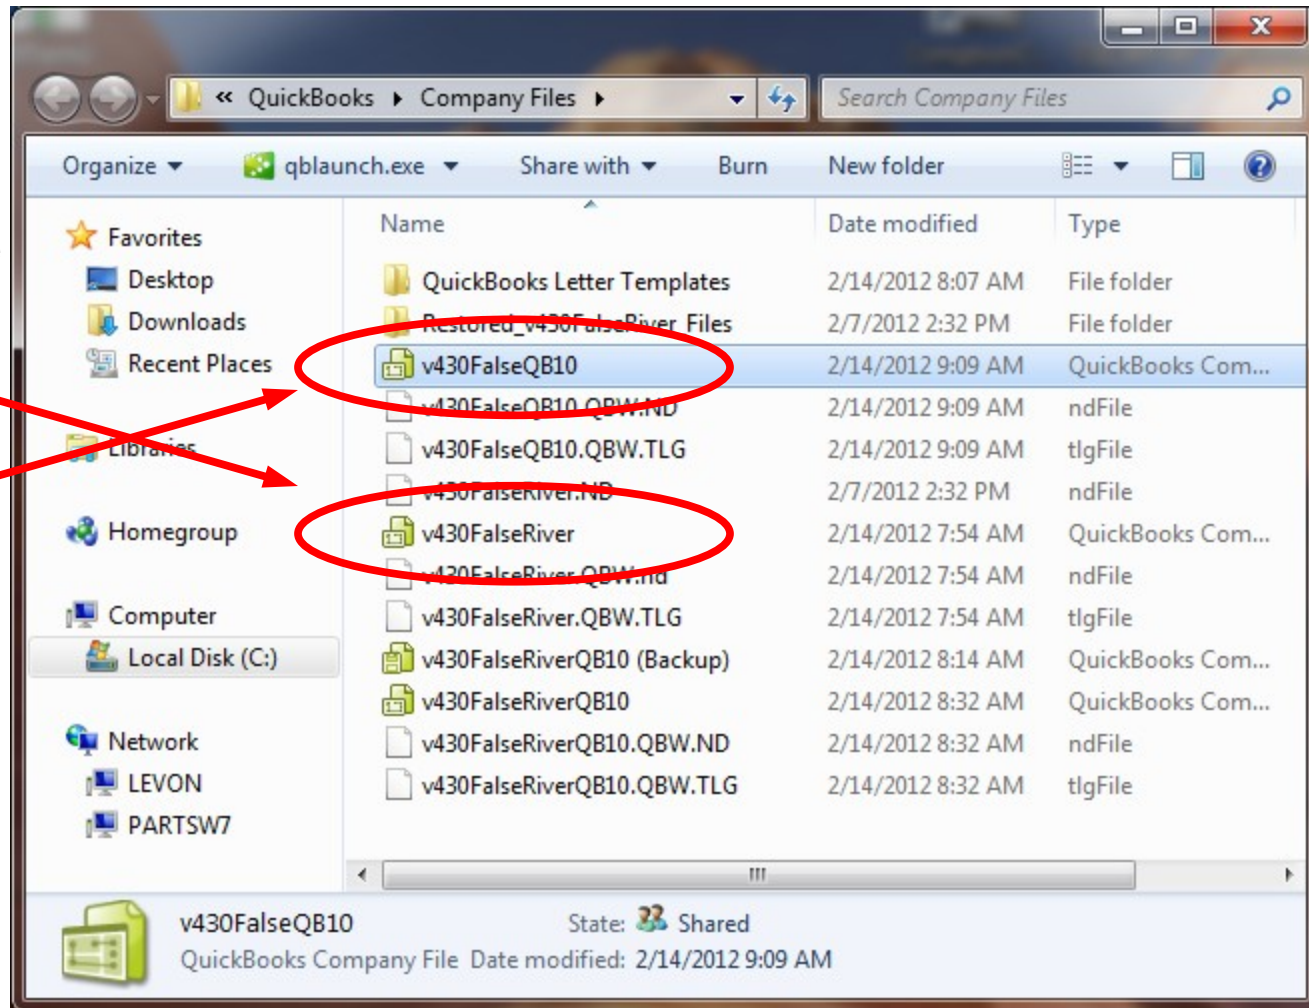

CQI – Could not start QuickBooks

Fix (continued):

Create a new QB Company File from the file you just changed and closed.

- > Rename original file
- > Copy the renamed file
- > Save the copy to the original file name

Restart QB, and open the new copy of the original file.

CQI – Could not start QuickBooks

Fix (continued):

Start CQI

Since "qbimport" is no longer considered a QB Integrated Application, you should get this:

Select:
"Yes, whenever this QB company file is open"

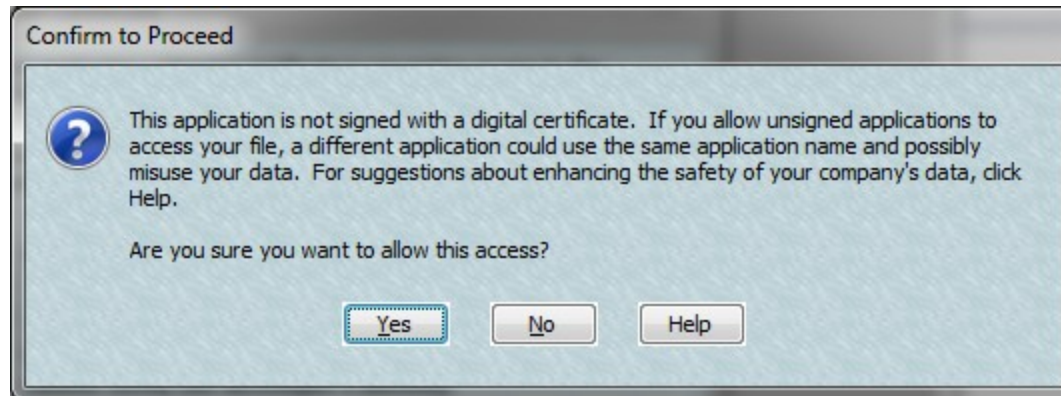

Click <Continue...>

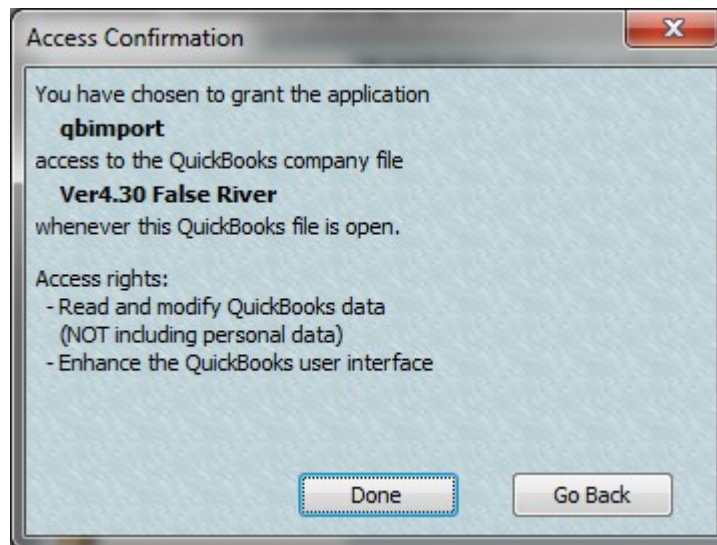

CQI – Could not start QuickBooks

Fix (continued):

Click <Yes>

Click <Done>

The "Could Not Start QB" error should be fixed.
