

The following index is provided as a quick reference aid for locating particular COMPTRON® functions through the hierarchy of menus and submenus. The right-hand column lists menu/option topics alphabetically, followed by the full “path” of menu option numbers that you would type to reach that subject, starting from the main Comptron Menu. (**NOTE:** Paths starting with 3- refer to the Management area, which would actually be shown as **Option 4** on the main menu if your store also uses Comptron Data s Finance and Insurance (F&I) Sales module.) You will find that each primary topic appears several times in the list, according to the different possible key words in its title that you may think of using to search for it. The left-hand column provides additional terms to clarify the primary topics on the right.
