

The following index is provided as a quick reference aid for locating particular COMPTON<sup>®</sup> Service Module functions through the hierarchy of menus and submenus. The right-hand column lists menu/option topics alphabetically, followed by the full “path” of menu option numbers that you would type to reach that subject, starting from the main Compton Menu. You will find that each primary topic appears several times in the list, according to the different possible key words in its title that you may think of using to search for it. The left-hand column provides additional terms to clarify the primary topics on the right. (**NOTE:** For Management functions affecting your Service department, refer to the main Compton Menu Path Index in the Point of Sale/Inventory Control Manual. Paths starting with 3- indicate Management Menu options.)
